H2H – Hospital to Home

About H2H – Hospital to Home

A Flagship Initiative by Indo-American (AMN) Health and Research Foundation

H2H – Hospital to Home is a visionary initiative designed to seamlessly extend hospital-level healthcare into the comfort of one's home. Rooted in the belief that healing is most effective when patients feel safe, supported, and connected, H2H ensures that individuals receive professional medical care without the need to remain in a clinical environment.

Our Purpose

H2H exists to make healthcare more accessible, convenient, and personalized. Whether it's recovery after surgery, managing chronic illnesses, or elderly care, the program supports patients through every step—within the familiar surroundings of their home, close to family and away from the stress of hospital visits.

This initiative aligns with the Foundation's mission to bring integrative, compassionate healthcare to communities, blending medical excellence with personal dignity.

Core Services Offered:

- Post-hospitalization nursing care
- Chronic disease monitoring and support
- Home visits by doctors, nurses, and therapists
- Teleconsultation and virtual follow-ups
- Diagnostic services and sample collection at home
- Palliative and geriatric support
- Physiotherapy and rehabilitation
- 24/7 remote health monitoring
- Connected Electronic Medical Records (EMR)

Who We Serve:

- Patients recently discharged from hospitals
- Elderly individuals requiring regular care
- Those with mobility issues
- Individuals needing long-term or palliative support
- Families seeking professional care without hospitalization

H2H – Hospital to Home

Technology Meets Human Compassion

H2H integrates modern medical technology—like AI-assisted alerts and real-time vitals tracking—with the human warmth of in-person visits, ensuring each patient feels both monitored and cared for.

Global Outlook, Local Commitment

Inspired by global healthcare models and adapted for India, H2H is committed to enhancing comfort, continuity, and confidence in care—not to reduce costs, but to provide high-quality care at home with greater ease and personalization.
